

# ADDERLINK X Series X2-Gold & X2-Gold Dual Access

**Keyboard, video, mouse, RS232 and high quality audio extender giving sharp, bright and ultra high-resolution video images at distances up to 300m (1000ft).**

The AdderLink X2-Gold, (part of the AdderLink X Series range), extends very high quality video, keyboard, mouse, transparent, high speed RS232 and digital audio up to 300m (1000ft) over Category 5 or higher UTP cable. The AdderLink X2-Gold has been designed to provide industry-leading video clarity, audio cable quality, compatibility and high rack densities.

Dual access versions provide local KVM access at the computer for local as well as remote control.

## FEATURES

### Video performance

Industry leading resolutions of 1600x1200 are achievable at 200m/650ft and 1280x1024 at 300m/1000ft.

### Video compensation

The AdderLink X2-Gold applies a high level of signal compensation that allows for a greatly increased range of very smooth and fine adjustments.

### Emulated DDC

Unless an extender actively supports DDC some well-known high performance video cards cannot be used at high resolutions. The AdderLink X2-Gold fully supports DDC.

### Brightness control

The AdderLink X2-Gold offers its own brightness correction to ensure that the image is crisp, clear and bright, regardless of the distance.

### Audio

Digital audio transmission delivers high fidelity; click less stereo audio for speakers and microphones.

### Integrated DeSkew

The AdderLink X2-Gold has integrated skew correction with a 300MHz bandwidth, meaning that it is more than powerful enough to counteract the negative effects of the skew.

### Rack options

Both transmitter and receiver units can be used stand-alone or up to 16 units can be mounted into a 2U chassis.
